

POPULATION HEALTH ENGINE

achi's **Population Health Engine** gives visibility to quality and coding performance across all contracts, creating a **strategic framework** from which clients can drive more favorable contracting terms and conditions. Using data from **Optum® Performance Analytics**, it provides a single source of truth for **monitoring quality and risk performance against contractual expectations**, simplifying their adherence and giving teams the insight they need to **maximize revenue** per agreement – no matter how many competing at-risk agreements are at play. Critically, that detailed information is then shared with appropriate client staff while populating patient outreach lists based on missing requirements to enable more streamlined care manager follow-up and true gaps in care closure.

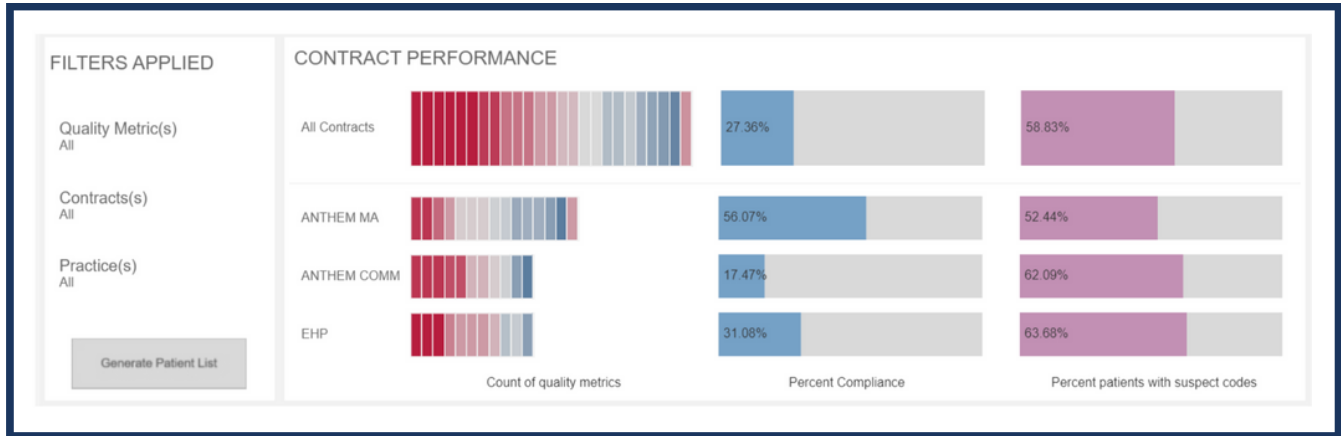

BENEFITS TO YOU

- Streamlines your ability to track performance in all at-risk contracts in order to maximize not only your financial revenue, but the patients' quality of care
- Provides a comprehensive, easy to navigate view of contract performance with the ability to drill down to patient level detail
- Generates visibility to out of compliance network providers and the respective patients that are not at targeted thresholds

CONTRACTUAL PERFORMANCE TRACKING MADE SIMPLE

The Pop Health Engine creates a strategic framework to proactively drive favorable contracting terms and conditions, while simplifying individual at-risk agreements' complex quality and HCC coding performance requirements.

DATA INTEGRITY, VISUALIZATION, + FUNCTIONALITY

- Allows for accurate provider attribution
- Displays individual contract quality definition adherence
- Shows individual or combined contract performance
- Drills to individual provider
- Drills to individual patients not at target
- Generates lists to aid in outreach and gap closure

*Whether you pay for or deliver healthcare, achi accelerates your success by providing insights and strategy you can act upon. Because when you need to get in front of value-based care, **action is the only option.***
