

achi's **Impact Tracker** gives teams **statistically validated insights** to measure the true outcomes of targeted clinical interventions. This tool:

- Compares cohorts using a proprietary statistical model
- Displays performance transparency of patient outcomes
- Creates visibility to what is actually happening
- Helps organizations make the right decision

# **BENEFITS TO YOU**

- Provides an analysis of broad populations and specific interventions to identify the impact of current initiatives or opportunities to improve cost/utilization outcomes
- Creates an in-depth understanding of current performance and identification of improvement opportunities with meaningful financial impact
- Establishes a repeatable, comprehensive approach to deliver statistically validated insights that creates visibility to actual results allowing management to make informed decisions

# CONNECT THE DOTS FOR THE FULL PICTURE

A narrow or incomplete view of results can easily lead to the wrong conclusion, often with strategic implications for clinical investments. The Impact Tracker is your solution.

# **OUR APPROACH**

- Develop robust matching of intervened and control patients to address selection bias
- Statistically evaluate and quantify differences in cost and utilization between matched cohorts
- Identify under-performers and provide targeted recommendations on how to address challenges

## **EXAMPLE USE CASES**

- Chronic condition management / intervention programs (e.g. diabetes, hypertension)
- Annual Wellness Visits
- Care management and navigation programs
- Social Determinants of Health interventions

CASE

STUDY

wanted to lower diabetes costs within their self-funded employee health plan and assess the impact of a diabetes management program on key clinical and financial outcomes.

A \$4B+ health system

## THE CHALLENGE PINPOINT THE OPPORTUNITIES

Using our Impact Tracker, the team **uncovered statistically validated insights into the performance of the diabetes management program.** This then led to the identification of cost/utilization opportunities to better manage the diabetic population and increase program ROI.

### **FUEL THE MOMENTUM**

As a result, the employer gained transparency into the performance of its diabetes program. They were equipped with the data and direction needed to make informed decisions for managing and expanding the program, allowing for better employee outcomes and less system spend.

Whether you pay for or deliver healthcare, achi accelerates your success by providing insights and strategy you can act upon. Because when you need to get in front of value-based care, **action is the only option**.
